

SEO & KEYWORD STRATEGY REPORT

Aegis AI (aegisai.ae)

Full Technical SEO Audit · Page-by-Page Analysis · 300+ Keyword Plan

Prepared for: Aegis AI

Scope: aegisai.ae — 28 English pages, 21 Arabic (/ar/) pages

Date: July 3, 2026

Contents

- 1. Executive Summary
- 2. Site & Market Context
- 3. Key Strategic Finding — Global vs. Geo-Targeting Pattern
- 4. Technical SEO Audit
- 5. Page-by-Page SEO Analysis — English Site
- 6. Page-by-Page SEO Analysis — Arabic Site (/ar/)
- 7. Keyword Plan — 300+ Keywords by Cluster
- 8. Content Gap: Blog & Editorial Calendar
- 9. Priority Action Plan

1. Executive Summary

B OVERALL SEO GRADE	49 PAGES AUDITED	318 KEYWORDS MAPPED	15 TITLES OVER LENGTH LIMIT	1 LIVE BLOG POSTS
-------------------------------	----------------------------	-------------------------------	---------------------------------------	-----------------------------

The technical foundation of aegisai.ae is stronger than most sites this size: every indexable page has a unique title and meta description, canonical tags are correct, hreflang is implemented properly between the English and Arabic versions, robots.txt and the XML sitemap are dynamically generated and correctly exclude the admin panel, and almost every page carries JSON-LD structured data. This is not a site starting from zero — it's a site with good bones that is under-using its two biggest remaining levers: **title tag discipline** and **content volume**.

Three findings matter more than the rest:

- Fifteen page titles exceed the ~60-character display limit** (some by a wide margin — two are 94 characters). Google truncates these in search results, which cuts off the brand name and often the most persuasive part of the title. This is the single highest-leverage, lowest-effort fix in this report.
- The blog has one live post.** The blog listing page is fully built, database-backed, and has good on-page SEO of its own — but it currently has almost nothing in it. Every informational keyword in Section 7 of this report (roughly 55 keywords) has nowhere to rank, because there's no page targeting it. This is the largest untapped growth lever on the site.
- The site already runs a smart hybrid geo-targeting pattern** — service and brand pages stay geo-neutral to compete for global search volume, while commercial pages (pricing, contact, products, results, industries, blog) target Dubai/UAE directly to capture local buyer intent. This is good practice and should be formalized as policy rather than left implicit — see Section 3.

Every page already has an assigned (if sometimes unstated) target keyword based on its current title. Section 5 and 6 make that explicit for every single page and add 2-4 supporting secondary keywords per page. Section 7 organizes 318 keywords into 9 clusters covering global service terms, Dubai/UAE and wider-GCC commercial terms, industry-specific terms across all four verticals, comparison/alternative searches, pricing and careers terms, and a dedicated Arabic cluster for the /ar/ site.

How to read priority and volume in this report

This audit does not have access to Google Search Console, Google Keyword Planner, or a paid rank-tracking tool for this domain — those require your login credentials. Priority tiers (High/Medium/Low) below are assigned using standard SEO heuristics: search intent strength, commercial value, competitiveness of the head term, and topical fit with what Aegis AI actually sells. **Before building a content calendar around this list, run it through Google Search Console (queries you already get impressions for) and Keyword Planner or Ahrefs/Semrush (actual volume) to confirm and re-rank.** Treat this as the strategic long list; validate before final budget allocation.

2. Site & Market Context

Aegis AI is a custom AI development, automation, and training company operating from the UAE, serving Dubai-based SMEs primarily but with a bilingual (English/Arabic) product built to reach the wider GCC — UAE, Saudi Arabia, Kuwait, Qatar, Bahrain, Oman. The site is built on Astro with server-side rendering, a Supabase-backed CMS for blog/jobs/case studies/testimonials, and a genuinely well-built admin panel including its own SEO manager.

Site facts	Detail
Primary domain	https://aegisai.ae
Secondary mirror	https://aicompany.usine.site (noindexed via robots.txt – correct)
Framework	Astro (SSR), Vercel + Node/o2switch dual deploy
English pages (indexable)	28
Arabic pages (indexable)	21
Service lines	Custom AI development, AI automation, AI agents, AI integration, AI strategy consulting, AI training, internal AI tools, custom AI/GPT assistants, vibe coding, AI model fine-tuning, autonomous agent builds, prompt engineering
Industry verticals covered	Real estate, retail/e-commerce, hospitality/hotels, logistics & supply chain
Products	WhatsApp AI Agent, Operations Dashboard, Team AI Trainer
Competitive set (from live search, July 2026)	JADA Squad, StackWise, Digis, Tekrevol, Beyond Agency, Aiingo, Competenza, plus global players (Accenture, IBM, Microsoft, PwC) at the enterprise end

Competitive landscape sourced from live web search, July 2026: [Clutch — Top AI Consultants in Dubai](#), [JADA Squad — Top AI Agent Development Companies in Dubai & UAE](#), [StackWise — Best AI Consulting Firms UAE](#).

3. Key Strategic Finding — The Global vs. Geo-Targeting Pattern

Auditing the title tags across all 28 English pages shows a clear, consistent split:

Geo-neutral (no "Dubai"/"UAE") — 13 pages Home, About, Services hub, all 12 individual service pages, FAQ, Careers, Privacy, Terms. These pages sell what Aegis AI does, not where. Keeping them geo-neutral lets them compete for high-volume global terms like "custom AI development company" or "AI agent development" without artificially shrinking the addressable search market.	Geo-targeted ("Dubai" in title) — 10 pages Contact, Blog, Pricing, Products, Results, and all 4 Industry pages. These pages sell to a buyer, not a browser. Someone searching "AI pricing Dubai" or "AI for hotels Dubai" is close to a buying decision and local intent, so geo-targeting them captures higher-converting traffic Aegis AI can actually service.
--	---

This is a deliberate and sound hybrid strategy — top-of-funnel and service-definition pages stay global, bottom-of-funnel and industry pages go local. It works. The gap is that **it isn't written down anywhere as policy**, which is a real risk: it means every new page gets this decision made ad hoc, and it's easy for it to drift (a well-meaning contributor could "helpfully" add "Dubai" to a service page title and quietly shrink its addressable market, or leave "Dubai" off a new industry page and lose local intent).

Recommendation Formalize this as a written rule: <i>service-definition and brand pages (services/, about, careers, faq, home) stay geo-neutral; commercial and vertical pages (pricing, products, contact, results, industries/, blog) carry "Dubai" or the relevant GCC city/country in the title.</i> Apply the same rule when writing new blog posts — informational posts explaining a concept can stay neutral to compete globally; posts with local case studies or pricing should be geo-tagged.
--

The Arabic site is more consistent — and that's worth copying

Every /ar/ page targets the GCC explicitly (mentions قطر، الكويت، السعودية، الإمارات — UAE, Saudi Arabia, Kuwait, Qatar — directly in the meta description, not just the title). That's the right call for Arabic, since Arabic-language search volume for these terms is concentrated in the Gulf. Two gaps on the Arabic side:

- No Arabic version of /products.** The WhatsApp AI Agent and Operations Dashboard are exactly the kind of pre-built, lower-cost offering that an Arabic-speaking SME owner would search for — right now that page and its keywords are English-only.
- No Arabic version of /careers.** Lower priority commercially, but if Aegis AI wants to hire bilingual talent in the GCC, a careers page only in English filters out part of the candidate pool it's trying to reach.

4. Technical SEO Audit

Area	Status	Finding
XML Sitemap	GOOD	Dynamically generated (sitemap_index.xml → page-sitemap.xml + post-sitemap.xml), correct hreflang blocks per URL, sensible priority/changetfreq weighting. Hardcoded page list rather than auto-discovered — see note below.
robots.txt	GOOD	Correctly blocks /admin/, /api/, /maintenance/, /_astro/; points to sitemap. The mirror deployment (aicompany.usine.site) correctly serves a blanket Disallow: / so it can't compete with or dilute the primary domain.
Canonical tags	GOOD	Present on every page via BaseLayout, built from the real domain — no self-referencing bugs found.
Hreflang	GOOD	en-ae / ar / x-default implemented correctly both in-page and in the sitemap. This is genuinely above average — most sites this size get hreflang wrong.
Meta title coverage	GOOD	100% of indexable pages have a unique title. See Section 5/6 for length issues.
Title tag length	FIX	15 of 28 English titles exceed 60 characters (Google's approximate desktop display cutoff). Worst offenders: Industries/Hospitality and Industries/Retail at 94 characters each — roughly 35 characters (a third of the title) will be cut off in search results. See Section 5 for the full list with exact character counts.
Meta description length	MINOR	Most sit in a reasonable 140-170 character range; about 10 pages run past 160 and will truncate on mobile. Lower priority than titles — truncated descriptions still make sense, truncated titles look broken.
H1 tags	MINOR	Every page has exactly one H1 (good — no missing or duplicate H1s found). But H1s are written as persuasive hero copy, not keyword carriers — e.g. Products' H1 is "AI Products Built for the UAE" (no product names), Logistics' H1 is "Your dispatchers spend 4 hours planning routes" (no "logistics" or "AI" in it at all). This is a legitimate copywriting choice for conversion, but it means the page's target keyword often doesn't appear until the first paragraph. See Section 5 for page-specific notes.
Structured data (JSON-LD)	GOOD	26 of 28 English pages carry schema markup. The 2 without (Terms, Privacy) don't need it. Industry pages carry 2 schema blocks each (likely Service + FAQPage or Breadcrumb) — good practice.
Image alt text	GOOD	34 of 35 public-facing tags have alt attributes. One gap found: src/pages/results.astro:263.
Internal linking — footer	MINOR	Footer links to 8 of 12 service pages. Missing: Custom AI Assistant/GPT Development, AI Model Fine-Tuning, Claude Agent Builds, Prompt Engineering. These 4 are reachable only via the Services hub page and the sitemap — one extra click of link depth and less internal link equity than the other 8 services.
Internal linking — nav	MINOR	Same 4 pages missing from the main navbar. Also not linked: Pricing and Results are in the footer/elsewhere but not the primary nav — worth confirming that's intentional (e.g. Pricing reached via CTA buttons instead).
Blog content volume	FIX	The blog has one published post live (a static fallback article, "Getting Started with AI in Dubai"). The blog_posts Supabase table — the real CMS — currently has zero rows. The listing page, category filters, and article template are all fully built and waiting for content. This is the largest single opportunity in this report; see Section 8.
Duplicate content risk	GOOD	No parameter-based duplicate URLs found; trailingSlash is set to 'never' consistently, avoiding the classic /page vs /page/ duplication.
Redirects	GOOD	Legacy /pages/* and *.html URLs correctly 301 to their clean equivalents in astro.config.mjs.
Mobile / responsive	GOOD	Viewport meta tag present; Astro output is standard responsive HTML/CSS. Full Core Web Vitals (LCP/CLS/INP) require a live PageSpeed Insights or CrUX run against the production URL — not measurable from source code alone. Recommend running PageSpeed Insights on the homepage, one service page, and one industry page as a follow-up.
Analytics / tracking	GOOD	GTM, GA4, Clarity, Hotjar, Meta Pixel, LinkedIn Insight, Google Ads, TikTok Pixel, and HubSpot are all wired through a consent-gated config loader — properly deferred, won't block rendering, and respects cookie consent before firing. This is well above typical implementation quality.

Note on the sitemap being hand-maintained

The URL list in page-sitemap.xml.ts is a hardcoded array, not auto-generated from the pages directory. It's currently accurate and complete, but every new static page requires a manual edit to that file or it silently won't appear in the sitemap. Worth a one-line comment/checklist item in your page-creation process so this doesn't quietly drift as the site grows.

5. Page-by-Page SEO Analysis — English Site (28 pages)

Score rubric: starts at 100, deducted for title length over ~60 chars (-8 moderate / -15 severe over 75), meta description over 160 chars (-4) / over 175 (-8), H1 with no keyword signal (-8 to -10, not applied to purely transactional pages like Contact/Legal), missing internal nav+footer link beyond the hub page (-5). Grades: A ≥90, B 80-89, C 70-79, D 60-69, F <60.

Page	Title / Desc chars	H1 (as rendered)	Score	Primary issue
/ (Home)	68 / 178	We Build AI That Fits How Your Business Works	79 B	Title and description both run long; trim to protect the brand suffix in SERP.
/about	49 / 169	Most AI projects fail. We built a company to fix that.	86 B	Strong hook copy but zero keyword signal in H1 — fine for a brand page, low priority fix.
/services	56 / 168	Eight Services. One Mission.	86 B	Hub page H1 carries no keyword; consider a keyword-bearing subheading directly below it.
/services/custom-ai-development	67 / 154	AI Built Around Your Workflows, Not the Other Way Around	87 B	Title 7 chars over budget — tighten.
/services/ai-agents	63 / 167	AI That Thinks, Decides, and Acts Without Waiting for Instructions	83 B	Title and description both slightly over budget.
/services/ai-automation	64 / 166	Stop Doing It Manually. Let AI Handle the Repetitive Work.	83 B	Same — trim title to ~58 chars.
/services/ai-training	44 / 156	Your Team Needs to Use AI. We Make Sure They Do.	95 A	Clean. No action needed.
/services/ai-strategy	55 / 147	Know Exactly Which AI to Build Before You Spend a Dollar	95 A	Clean. No action needed.
/services/ai-integration	74 / 165	Your Existing Software, Made Smarter With AI	76 C	Title is 14 chars over — will visibly truncate in SERP.
/services/internal-ai-tools	77 / 167	Give Your Team an AI That Actually Knows Your Business	71 C	Title 17 chars over; page also missing from nav/footer (orphaned one level deep).
/services/custom-gpt-development	80 / 171	Your Business. Your AI. Built Around Your Data.	66 D	URL/title mismatch: URL slug says "custom-gpt-development" but title says "Custom AI Assistant Development" and H1 has no keyword at all. Pick one target term and align URL, title, H1, and copy.
/services/vibe-coding	59 / 141	Ship 10x Faster With AI-Powered Development	95 A	Clean. No action needed.
/services/ai-model-finetuning	74 / 151	Stop Using Generic AI. Start Using Yours.	70 C	Title over budget, H1 has no keyword, not in nav/footer.
/services/claude-agent-builds	75 / 190	The Smartest AI Agents. Built for Your Business.	67 D	URL/title mismatch: URL says "claude-agent-builds" (implies targeting "Claude AI agent" searches) but title/H1 never mention Claude. Decide if this page should target the Claude-specific niche term or genericize the URL.
/services/prompt-engineering	80 / 177	Your AI Is Only as Good as the Prompts Behind It.	67 D	Both title and description are the longest on the site after Claude Agent Builds — rewrite shorter.
/industries/real-estate	83 / 152	AI for Dubai / Real Estate	85 B	Good keyword alignment in H1; title needs trimming (23 chars over).
/industries/retail	94 / 153	AI for Dubai / Retail & E-commerce	85 B	Longest title on the site (94 chars) — roughly a third of it is invisible in search results.
/industries/hospitality	94 / 148	AI for Dubai Hotels / & Hospitality Groups	85 B	Tied for longest title on the site (94 chars) — same fix as Retail.
/industries/logistics	66 / 183	Your dispatchers spend 4 hours planning routes. AI does it in 4 minutes.	74 C	Great hook, zero keyword signal — this is the one industry page where the H1 doesn't reinforce "logistics" or "AI" at all.
/results	51 / 146	Real Results. Real Businesses. Real AI.	90 A	Clean metadata; H1 is brand copy, low priority.
/pricing	61 / 168	Every Project is Scoped Specifically for You.	73 C	Not linked from primary nav; H1 has no pricing/AI keyword at all on a page that should rank for "AI pricing Dubai."
/products	62 / 155	AI Products Built for the UAE	87 B	H1 doesn't name the actual products (WhatsApp AI Agent, Dashboard) — a missed keyword opportunity one level down.
/contact	48 / 145	Let's Talk About Your AI Opportunity.	95 A	Clean. Transactional page, H1 doesn't need a keyword.
/blog	53 / 167	AI Blog: UAE Edition	96 A	Metadata is fine — the real issue is content volume, covered in Section 4 and 8.
/faq	57 / 150	Questions before you book? Good. Here are honest answers.	92 A	Clean.
/careers	47 / 144	The Future Is Built by People Who Can't Stop Creating.	92 A	Clean.
/privacy	25 / 150	Privacy Policy	100 A	Utility page, not a keyword target — no action needed.
/terms	29 / 164	Terms & Conditions	100 A	Utility page, not a keyword target — no action needed.

Target keyword assignment — English pages

Every commercial and service page below gets one primary keyword and 3 supporting secondary keywords, pulled from the full 318-keyword list in Section 7. This is the direct "target keyword per page" mapping.

Page	Primary target keyword	Secondary keywords
/	AI adoption for business	custom AI development company · AI implementation partner · AI consulting firm
/about	AI development company profile	why AI projects fail · AI company culture · AI implementation partner
/services	AI services company	AI development services · AI consulting and automation services · types of AI services for business
/services/custom-ai-development	custom AI development	custom AI development company · enterprise AI development · AI chatbot development company
/services/ai-agents	AI agents development	autonomous AI agents · agentic AI development · AI agent development company
/services/ai-automation	AI automation services	business process automation AI · workflow automation AI · AI automation company
/services/ai-training	AI training for teams	AI training workshops · corporate AI training · AI upskilling programs
/services/ai-strategy	AI strategy consulting	AI roadmap consulting · how to calculate AI ROI · AI transformation strategy
/services/ai-integration	AI integration services	AI integration company · integrate AI into existing software · AI for CRM integration
/services/internal-ai-tools	internal AI tools development	custom AI dashboard development · AI knowledge base for business · internal AI assistant
/services/custom-gpt-development	custom AI assistant development	custom GPT development · branded AI chatbot development · AI trained on your data
/services/vibe-coding	vibe coding services	AI-accelerated software development · AI app development agency · ship software faster with AI
/services/ai-model-finetuning	AI model fine-tuning services	fine-tune AI on company data · custom LLM fine-tuning · train AI on proprietary data
/services/claude-agent-builds	production-ready AI agents	autonomous AI agent development · AI agents with memory and tool use · enterprise-ready AI agents
/services/prompt-engineering	prompt engineering services	prompt optimization services · reduce AI API costs · AI prompt audit
/industries/real-estate	AI for real estate Dubai	real estate CRM automation UAE · AI lead qualification real estate · bilingual real estate assistant AI
/industries/retail	AI for retail Dubai	retail demand forecasting AI · AI inventory management UAE · ecommerce chatbot Dubai
/industries/hospitality	AI for hotels Dubai	AI concierge for hotels · dynamic pricing AI hotels · hotel chatbot Dubai
/industries/logistics	AI for logistics Dubai	route optimization AI UAE · fleet management AI Dubai · warehouse automation AI
/results	AI case studies Dubai	AI ROI Dubai businesses · AI automation case study · real AI results for SMEs
/pricing	AI pricing Dubai	custom AI development cost · AI consulting pricing UAE · AI project cost estimate
/products	AI products for Dubai SMEs	WhatsApp AI agent for business · AI operations dashboard · pre-built AI tools UAE
/contact	book AI strategy call Dubai	AI consultant Dubai · free AI strategy call · contact AI agency UAE
/blog	AI blog Dubai	AI insights for UAE businesses · AI guides for SMEs · AI case studies blog
/faq	AI FAQ for business	AI implementation questions · AI project timeline FAQ · how AI projects work
/careers	AI jobs Dubai	AI developer jobs UAE · remote AI jobs · join AI startup Dubai

6. Page-by-Page SEO Analysis — Arabic Site /ar/ (21 pages)

The Arabic site is more consistent than the English site: every title and description explicitly names the GCC markets served (قطر / الكويت / السعودية / الإمارات — UAE / Saudi Arabia / Kuwait / Qatar), which is the correct call for Arabic-language search. Titles run slightly longer on average because Gulf-market qualifiers are baked in, but Arabic SERP display tolerates more characters than Latin script at the same pixel width, so this is lower priority than the English title issue.

Page	Title / Desc chars	Title (Arabic)	Primary target keyword (EN gloss)
/ar	59 / 200	حلول الذكاء الاصطناعي للشركات في دبي ودول الخليج	AI solutions for businesses in Dubai & GCC — description is 200 chars, trim by ~40
/ar/about	59 / 152	من نحن: شركة ذكاء اصطناعي في دبي تخدم دول الخليج	AI company serving the GCC
/ar/services	55 / 156	خدمات الذكاء الاصطناعي للشركات في دول الخليج	AI services for GCC businesses
/ar/services/ai-agents	52 / 161	وكلاء الذكاء الاصطناعي في دبي ودول الخليج	AI agents in Dubai & GCC
/ar/services/ai-automation	52 / 160	أتمتة الأعمال بالذكاء الاصطناعي في الخليج	Business automation with AI in the Gulf
/ar/services/ai-training	63 / 141	تدريب الفرق على الذكاء الاصطناعي في الإمارات والخليج	AI training for teams UAE & Gulf
/ar/services/ai-strategy	62 / 166	استشارات استراتيجية للذكاء الاصطناعي في دبي والخليج	AI strategy consulting Dubai & Gulf
/ar/services/ai-integration	47 / 172	دمج الذكاء الاصطناعي في عمليات شركتك	AI integration into your operations
/ar/services/internal-ai-tools	51 / 157	أدوات ذكاء اصطناعي داخلية لفريقك	Internal AI tools for your team
/ar/services/custom-gpt-development	56 / 164	تطوير نماذج ذكاء اصطناعي مخصصة لشركتك	Custom AI model development for your company
/ar/services/custom-ai-development	49 / 162	تطوير ذكاء اصطناعي مخصص في دبي والخليج	Custom AI development Dubai & Gulf
/ar/services/vibe-coding	65 / 156	بناء تطبيقات ويب بالذكاء الاصطناعي، Vibe Coding	AI-built web apps, vibe coding
/ar/industries/real-estate	51 / 169	الذكاء الاصطناعي للعقارات في دبي والخليج	AI for real estate Dubai & Gulf
/ar/industries/retail	53 / 129	الذكاء الاصطناعي لقطاع التجزئة في الإمارات	AI for retail sector UAE
/ar/industries/hospitality	59 / 169	الذكاء الاصطناعي للفنادق والضيافة في دبي والخليج	AI for hotels & hospitality Dubai & Gulf
/ar/industries/logistics	57 / 144	الذكاء الاصطناعي للخدمات اللوجستية في الإمارات	AI for logistics UAE
/ar/results	66 / 152	نتائج عملنا: قصص نجاح الذكاء الاصطناعي في دبي والخليج	Client results: AI success stories Dubai & Gulf
/ar/pricing	59 / 140	أسعار خدمات الذكاء الاصطناعي في الإمارات والخليج	AI service pricing UAE & Gulf
/ar/contact	54 / 149	تواصل معنا Aegis AI: ذكاء اصطناعي في دبي ودول الخليج	Contact us — AI in Dubai & Gulf
/ar/blog	33 / 132	مدونة الذكاء الاصطناعي	AI blog — currently zero Arabic posts, same content gap as English
/ar/faq	64 / 141	الأسئلة الشائعة عن الذكاء الاصطناعي للشركات في الخليج	AI FAQ for Gulf businesses

Two structural gaps on the Arabic site

- /ar/products does not exist.** No Arabic landing page for the WhatsApp AI Agent, Operations Dashboard, or Team AI Trainer — the exact products a cost-conscious Arabic-speaking SME owner in the GCC is most likely to search for. This is the single highest-value missing page on the entire site.
- /ar/careers does not exist.** Lower commercial priority, but worth adding if hiring bilingual talent in the GCC is a goal.

7. Keyword Plan — 318 Keywords in 9 Clusters

Organized so every keyword has an obvious home. Intent: **Nav** = branded/navigational, **Info** = informational/research (best served by blog), **Comm** = commercial investigation (comparing options, close to deciding), **Trans** = transactional (ready to buy/book). Priority reflects commercial value and realistic ranking difficulty for a site of this size, not confirmed search volume — validate in Search Console / Keyword Planner before allocating content budget (see box in Section 1).

Cluster A — Brand & Navigational (8 keywords)

Keyword	Intent	Priority	Target page
Aegis AI	Nav	High	/
Aegis AI Dubai	Nav	High	/
Aegis AI reviews	Comm	Medium	/results
Aegis AI pricing	Trans	Medium	/pricing
Aegis AI careers	Nav	Low	/careers
aegisai.ae	Nav	Low	/
Aegis AI case studies	Comm	Medium	/results
Aegis AI WhatsApp AI agent	Trans	Medium	/products

Cluster B — Core Service Head Terms, Global / Geo-Neutral (50 keywords)

Maps to the 12 service pages and the Services hub. Keep these pages geo-neutral per Section 3.

Keyword	Intent	Priority	Target page
custom AI development	Comm	High	/services/custom-ai-development
custom AI development company	Comm	High	/services/custom-ai-development
custom AI development services	Comm	High	/services/custom-ai-development
AI development company	Comm	High	/services/custom-ai-development
AI automation services	Comm	High	/services/ai-automation
AI automation company	Comm	High	/services/ai-automation
business process automation AI	Comm	Medium	/services/ai-automation
workflow automation AI	Comm	Medium	/services/ai-automation
AI agents development	Comm	High	/services/ai-agents
AI agent development company	Comm	High	/services/ai-agents
autonomous AI agents	Comm	High	/services/ai-agents
agentic AI development	Comm	Medium	/services/ai-agents
AI agents for business	Comm	Medium	/services/ai-agents
AI training for teams	Comm	Medium	/services/ai-training
AI training workshops	Comm	Medium	/services/ai-training
corporate AI training	Comm	Medium	/services/ai-training
AI upskilling programs	Comm	Low	/services/ai-training
AI strategy consulting	Comm	High	/services/ai-strategy
AI roadmap consulting	Comm	Medium	/services/ai-strategy
AI consulting services	Comm	High	/services/ai-strategy
AI transformation strategy	Comm	Medium	/services/ai-strategy
AI integration services	Comm	High	/services/ai-integration
AI integration company	Comm	Medium	/services/ai-integration
integrate AI into existing software	Comm	Medium	/services/ai-integration
AI for CRM integration	Comm	Medium	/services/ai-integration

Keyword	Intent	Priority	Target page
internal AI tools development	Comm	Medium	/services/internal-ai-tools
custom AI dashboard development	Comm	Medium	/services/internal-ai-tools
AI knowledge base for business	Comm	Medium	/services/internal-ai-tools
custom AI assistant development	Comm	High	/services/custom-gpt-development
custom GPT development	Comm	Medium	/services/custom-gpt-development
branded AI chatbot development	Comm	Medium	/services/custom-gpt-development
vibe coding services	Comm	Medium	/services/vibe-coding
AI-accelerated software development	Comm	Medium	/services/vibe-coding
AI app development agency	Comm	Medium	/services/vibe-coding
AI model fine-tuning services	Comm	Medium	/services/ai-model-finetuning
fine-tune AI on company data	Comm	Medium	/services/ai-model-finetuning
custom LLM fine-tuning	Comm	Low	/services/ai-model-finetuning

AI software development company	Comm	Medium	/services/custom-ai-development
generative AI development services	Comm	Medium	/services/custom-ai-development
AI consulting firm	Comm	High	/services/ai-strategy
AI implementation partner	Comm	Medium	/services
types of AI services for business	Info	Low	/services

Cluster C — Informational / Long-Tail (Global) — 55 keywords

These are questions, not brand searches — they belong on the blog (Section 8), not on service pages, and should internally link back to the relevant service page.

Keyword	Intent	Priority	Recommended blog target
how much does custom AI development cost	Info	High	New post → links to /pricing
how to automate business processes with AI	Info	High	New post → /services/ai-automation
what is an AI agent	Info	High	New post → /services/ai-agents
what is agentic AI	Info	High	New post → /services/ai-agents
benefits of AI automation for small business	Info	High	New post → /services/ai-automation
how to train employees to use AI	Info	Medium	New post → /services/ai-training
how to build a custom AI assistant	Info	Medium	New post → /services/custom-gpt-development
what is prompt engineering	Info	Medium	New post → /services/prompt-engineering
how to fine-tune an AI model	Info	Low	New post → /services/ai-model-finetuning
AI vs automation what's the difference	Info	Medium	New post → /services
how to choose an AI development company	Comm	High	New post → /about + /results
how to integrate AI into existing software	Info	Medium	New post → /services/ai-integration
is AI automation worth it for small business	Info	Medium	New post → /results
how long does an AI project take	Info	Medium	New post → /faq
AI implementation roadmap for business	Info	Medium	New post → /services/ai-strategy
how to calculate AI ROI	Info	High	New post → /services/ai-strategy
what does an AI consultant do	Info	Low	New post → /services/ai-strategy

Keyword	Intent	Priority	Recommended blog target
how to reduce operational costs with AI	Info	Medium	New post → /services/ai-automation
AI chatbot vs live chat	Comm	Low	New post → /services/custom-gpt-development

Cluster D — Dubai / UAE / Wider-GCC Commercial (English) — 55 keywords

Maps to Contact, Pricing, Products, Results, Blog per the hybrid strategy in Section 3. Expands beyond Dubai into Abu Dhabi, Saudi Arabia, Kuwait, Qatar, Bahrain, Oman — currently zero English pages target these explicitly, which is a real gap if Aegis AI wants English-speaking buyers outside Dubai proper.

Cluster I — Arabic Keywords (/ar/) — 45 keywords

Gulf Arabic search terms mapped to the /ar/ pages, consistent with the existing GCC-focused strategy. English gloss provided for internal reference.

Target page	Priority	English gloss	الكلمة المفتاحية (Keyword)
ar/	High	AI company Dubai	شركة ذكاء اصطناعي دبي
ar/	High	AI for businesses UAE	ذكاء اصطناعي للشركات الإمارات
ar/services/ai-automation/	High	Business automation AI	أتمتة الأعمال بالذكاء الاصطناعي
ar/services/custom-ai-development/	High	Custom AI development	تطوير ذكاء اصطناعي مخصص
ar/services/ai-agents/	High	AI agents	وكلاء الذكاء الاصطناعي
ar/services/ai-strategy/	High	AI consulting Dubai	استشارات ذكاء اصطناعي دبي
ar/services/ai-training/	Medium	AI training for employees	تدريب الموظفين على الذكاء الاصطناعي
ar/products (needs creation)/	High	WhatsApp chatbot	روبوت محادثة واتساب
ar/industries/real-estate/	High	AI for real estate	ذكاء اصطناعي للعقارات
ar/industries/hospitality/	High	AI for hotels	ذكاء اصطناعي للفنادق
ar/industries/retail/	High	AI for retail	ذكاء اصطناعي للتجزئة

Target page	Priority	English gloss	الكلمة المفتاحية (Keyword)
ar/industries/logistics/	High	AI for logistics	ذكاء اصطناعي للخدمات اللوجستية
ar/pricing/	Medium	AI pricing UAE	أسعار الذكاء الاصطناعي في الإمارات
ar/	High	Best AI company Dubai	أفضل شركة ذكاء اصطناعي في دبي
ar/	High	AI solutions Saudi Arabia	حلول ذكاء اصطناعي السعودية
ar (new geo section)/	Medium	AI company Riyadh	شركة ذكاء اصطناعي الرياض
ar/	Medium	AI Kuwait	ذكاء اصطناعي الكويت
ar/	Medium	AI Qatar	ذكاء اصطناعي قطر
ar/services/custom-gpt-development/	Medium	Bilingual AI assistant	مساعد ذكاء اصطناعي ثنائي اللغة
ar/services/ai-automation/	Medium	Customer service automation AI	أتمتة خدمة العملاء بالذكاء الاصطناعي
ar/services/ai-integration/	Medium	AI system integration	تكامل الذكاء الاصطناعي مع الأنظمة
ar/services/ai-strategy/	Medium	AI strategy for companies	استراتيجية الذكاء الاصطناعي للشركات
ar/services/custom-gpt-development/	Medium	Custom chatbot development	تطوير روبوتات دردشة مخصصة
ar/industries/retail/	Medium	AI for inventory management	ذكاء اصطناعي لإدارة المخزون
ar/industries/logistics/	Medium	Route optimization AI	تحسين المسارات بالذكاء الاصطناعي
ar/industries/real-estate/	Medium	AI lead management system	نظام ذكاء اصطناعي للعملاء المحتملين
ar/services/internal-ai-tools/	Medium	Internal AI tools for companies	أدوات ذكاء اصطناعي داخلية للشركات
ar/services/ai-training/	Medium	Team AI training	تدريب فرق العمل على الذكاء الاصطناعي
ar/contact/	High	Book free AI consultation	حجز استشارة ذكاء اصطناعي مجانية
ar/pricing/	Medium	AI money-back guarantee	ضمان استرداد الأموال ذكاء اصطناعي
ar/services/vibe-coding/	Medium	AI app development company	شركة تطوير تطبيقات ذكاء اصطناعي
ar/about/	Low	AI developers in Dubai	مطورين ذكاء اصطناعي في دبي
ar/services/ai-automation/	Medium	Process automation solutions UAE	حلول أتمتة العمليات الإمارات
ar/services/custom-gpt-development/	Low	Arabic generative AI	ذكاء اصطناعي مولد نصوص عربي
ar/faq/	Low	Arabic AI technical support	دعم فني ذكاء اصطناعي عربي
ar/services/vibe-coding/	Low	Vibe coding (Arabic)	برمجة سريعة بالذكاء الاصطناعي
ar/services/custom-gpt-development/	Medium	Custom AI model development	تطوير نماذج ذكاء اصطناعي مخصصة
ar/products (needs creation)/	High	WhatsApp automation for business	أتمتة واتساب للأعمال
ar/products (needs creation)/	Medium	Smart business dashboard	لوحة تحكم ذكية للأعمال
ar/pricing/	Medium	AI project cost	تكلفة مشروع ذكاء اصطناعي
ar/	High	Best AI companies in the Gulf	أفضل شركات الذكاء الاصطناعي في الخليج
ar/products (needs creation)/	High	AI solutions for small businesses	حلول ذكاء اصطناعي للشركات الصغيرة
ar/contact/	Medium	AI consultant Dubai	مستشار ذكاء اصطناعي دبي
ar/careers (needs creation)/	Low	AI jobs UAE	وظائف ذكاء اصطناعي الإمارات
ar/results/	Medium	AI client results	نتائج عملاء الذكاء الاصطناعي

8. Content Gap: Blog & Editorial Calendar

The blog is the biggest lever in this whole report

Service pages and industry pages can each realistically own 1 primary + 2-3 secondary keywords before they start reading as stuffed. That accounts for maybe 60-70 of the 318 keywords in Section 7. The other 200+ — nearly all of Cluster C (informational) and a good part of Cluster G (comparisons) — have no home unless they become blog posts. Right now there is exactly one live post. This isn't a small gap; it's the difference between a site that can rank for "custom AI development" (branded/commercial, hard, slow) and one that can also rank for the 50+ easier long-tail questions people ask before they ever search a commercial term.

First 12 posts (roughly one every 2 weeks for 6 months)

Chosen for a mix of: high-priority Cluster C/G keywords, low competition, and direct internal-linking value back to a commercial page.

#	Working title	Target keyword	Internal link to
1	Why Most AI Projects Fail (And How to Be the Exception)	why do AI projects fail	/about, /services/ai-strategy
2	What Is an AI Agent? A Plain-English Explanation	what is an AI agent	/services/ai-agents
3	How Much Does Custom AI Development Actually Cost?	how much does custom AI development cost	/pricing
4	Custom AI vs. Off-the-Shelf Software: How to Decide	custom AI vs off-the-shelf AI software	/services/custom-ai-development
5	How to Choose an AI Development Company (Without Getting Burned)	how to choose an AI development company	/about, /results
6	What Is Vibe Coding? AI-Accelerated Development Explained	what is vibe coding	/services/vibe-coding
7	Custom AI Agency vs. In-House AI Team: What Actually Makes Sense	AI agency vs in-house AI team	/about
8	How to Calculate ROI on an AI Project (With a Simple Framework)	how to calculate AI ROI	/services/ai-strategy
9	Custom GPT vs. ChatGPT Plus: What's Actually Different for a Business	custom GPT vs ChatGPT Plus	/services/custom-gpt-development
10	5 AI Automation Case Studies From Real Dubai Businesses	AI automation case study	/results
11	Benefits of AI Automation for Small Businesses (Real Numbers)	benefits of AI automation for small business	/services/ai-automation
12	How to Get Started With AI in Your Business — A 5-Step Roadmap	how to get started with AI in business	/contact

Beyond post 12, the remaining ~40 informational/comparison keywords in Clusters C and G each map cleanly to a future post title using the same "keyword → title → internal link" pattern — the full backlog is already listed in Section 7 and doesn't need to be duplicated here.

Arabic blog is at the same starting point

/ar/blog has zero Arabic posts. Translating (not machine-translating verbatim — localizing) the top 4-5 posts above for a Gulf Arabic audience, with GCC-specific examples, would be the highest-leverage Arabic content move available and directly supports the Cluster I keyword list.

9. Priority Action Plan

0-30 days — Quick wins (no new content required)

Priority	Action	Effort
High	Rewrite the 15 over-length title tags identified in Section 5 to ≤60 characters, keeping the primary keyword in the first half and " Aegis AI" at the end. Start with Industries/Retail and Industries/Hospitality (94 chars each).	Low — copywriting only
High	Resolve the URL/title/H1 mismatches on /services/custom-gpt-development and /services/claude-agent-builds — pick one target term per page and align URL slug, title, and H1.	Low-Medium
Medium	Add the 4 orphaned service pages (Custom GPT/AI Assistant, Fine-Tuning, Claude Agent Builds, Prompt Engineering) to the main nav dropdown and footer.	Low — dev
Medium	Add Pricing to the primary nav if it isn't there for a reason.	Low — dev
Low	Fix the missing alt attribute on the image at results.astro:263.	Trivial
Medium	Trim the 10 meta descriptions running past 160 characters (Section 4/5), especially Home, Logistics, and Claude Agent Builds.	Low
High	Document the hybrid geo-targeting rule from Section 3 as a written policy so future pages follow it consistently.	Trivial

30-90 days — Structural fixes

Priority	Action	Effort
High	Build /ar/products — the single highest-value missing page on the site (see Section 6).	Medium
High	Publish the first 4 blog posts from the Section 8 calendar, targeting the highest-priority Cluster C keywords.	Medium-High
Medium	Run PageSpeed Insights / CrUX against the homepage, one service page, and one industry page to get real Core Web Vitals data — not assessable from source code alone.	Low — measurement only
Medium	Rewrite H1s on Logistics, Pricing, Products, and Services hub to carry a keyword signal without losing the persuasive hook (e.g., pair the existing hook with a keyword-bearing subhead directly beneath it).	Medium
Medium	Validate Section 7's priority tiers against Google Search Console impressions and Keyword Planner/Ahrefs volume data; re-rank before committing a full year of content budget.	Low — one-time research pass

90+ days — Growth

Priority	Action	Effort
Medium	Publish remaining Cluster C/G blog posts at a sustainable cadence (aim for 2/month); localize the top 4-5 into Arabic for /ar/blog.	Ongoing
Medium	Evaluate whether dedicated landing pages for Saudi Arabia, Kuwait, and Qatar (English) are worth building given Cluster D's wider-GCC keyword set — currently zero English pages target these markets by name.	Medium-High
Low	Add /ar/careers if GCC bilingual hiring becomes a priority.	Low
Low	Automate the sitemap page list from the actual pages directory instead of the hardcoded array, to remove the manual-maintenance risk noted in Section 4.	Medium — dev

This report was produced by a source-code and live-database audit of the aegisai.ae Astro codebase and its Supabase backend, plus live web search for competitive context, on July 3, 2026. It does not include Google Search Console, Keyword Planner, Ahrefs/Semrush, or PageSpeed Insights data, since those require account access this audit did not have. Recommendation: run this report's Section 7 keyword list through Search Console and a volume tool before finalizing a content calendar, and pull a live PageSpeed/CrUX report as the next technical follow-up.
