

Make AI real for the UAE's 1.3M SMEs

Practical AI implementation, automation and custom tools for service businesses — turning AI from a trend into everyday operational infrastructure.

SMEs know they need AI. They don't know what, how, or how to make it stick.

- ✓ UAE SMEs know AI matters but can't tell **what** to implement first, **how** to integrate it, or **how** to get teams to actually adopt it.
- ✓ Leads, follow-ups, support and reporting still run **manually** across WhatsApp, email, spreadsheets and disconnected tools.
- ✓ Generic AI tools add confusion when they aren't configured around a real business process.
- ✓ Most have **no internal AI team** — and can't afford a large consultancy.

The UAE is the ideal environment for practical SME AI.

1.4M

registered businesses in the UAE by
end of 2025 (~250k added that
year)

94%

of UAE businesses are SMEs — over
60% of non-oil GDP

557k

officially registered UAE SMEs
(Ministry of Economy / WAM, 2022)

35%

of UAE SMEs are service-based
businesses (Dubai SME) — Lenoo's
core ICP

SMEs are the backbone of the economy and the explicit focus of national AI and digital-transformation policy. The demand is mandated from the top — **but the last mile, real implementation inside small teams, is unserved.** That gap is Lenoo.

The market, bottom-up.

TAM · UAE SME MARKET

AED 27.9_B

per year

557,000 UAE SMEs × AED 50k avg annual contract

SAM · LENOO'S ICP

AED 4.87_B

per year

~97,000 service-sector, client-facing SMEs × AED 50k

SOM · 3-YEAR OBTAINABLE

AED 20_M

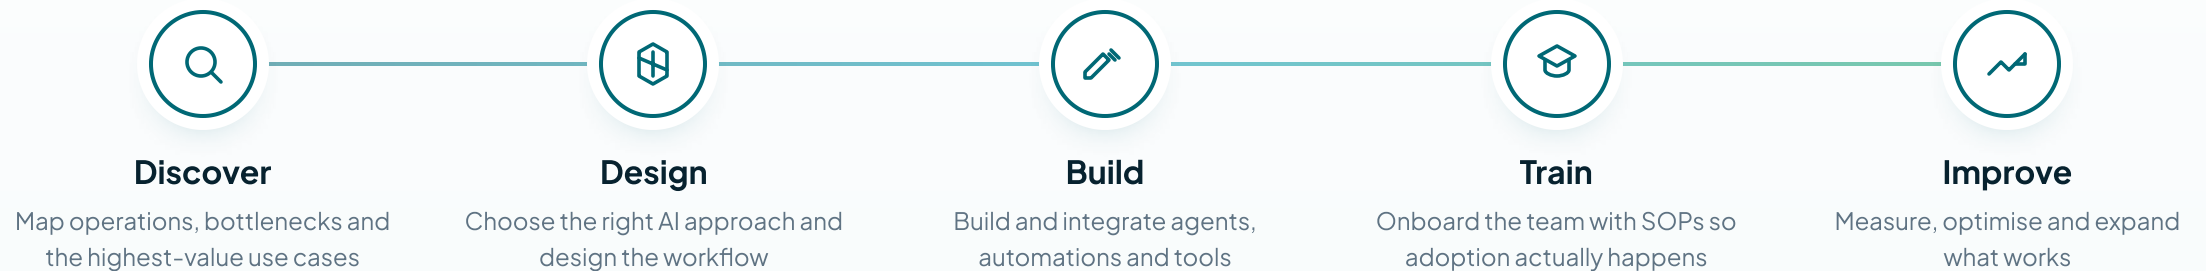

per year ARR

~400 clients — just **0.4%** of SAM

Base: 557,000 official UAE SMEs (Ministry of Economy / WAM, 2022) — the conservative registered-SME count within ~1.4M total licenses. Services = 35% of SMEs (Dubai SME), narrowed ~50% to the client-facing ICP. ACV AED 50k is a conservative point estimate (defensible range AED 30k–150k). Sources: WAM 2023 · Dubai SME · CBUAE.

Lenoo AI in one slide

We help small and medium UAE companies **identify, build and adopt** AI systems that fit their actual operations. We start from business bottlenecks — not tools — and stay until the team is using it.

An **AI enablement partner** for service-based SMEs — not a generic “AI agency”.

Not a roadmap. A price list.

AI Agents

Lead qualification, customer support, sales follow-up and internal assistants.

Workflow Automation

Connecting tools and removing repetitive manual work across comms, CRM and reporting.

Internal AI Systems

Knowledge bases, dashboards, employee copilots and operational tooling.

Custom “Vibe-Coded” Tools

MVPs, client portals, booking systems and bespoke internal apps — fast.

AI Strategy & Roadmap

Identifying the right use cases and planning a realistic implementation.

Training & Adoption

Workshops, SOPs and ongoing guidance so teams truly adopt the tools.

Who Lenoo is built for.

UAE service SMEs, up to ~250 employees, Dubai first — high enquiry volume, fragmented tools and no in-house AI team.

Professional services

Consultancies, accountants, legal, setup & advisory

Founders & CEOs — want growth without adding headcount

Pain: repeated intake

Client-service

Agencies, real estate, recruitment, B2B services

Commercial leaders — want faster lead response & conversion

Pain: slow follow-up

Operational SMEs

Clinics, training providers, multi-tool ops teams

Operations leaders — want fewer manual steps and errors

Pain: fragmented tools

Too complex for DIY, **too small for enterprise consulting** — the gap Lenoo is built for.

How Lenoo makes money today.

- 1 AI assessment & strategy** Paid discovery, opportunity mapping and an implementation roadmap.
- 2 Implementation projects** CORE Agents, automations, internal systems and custom tools — the core revenue.
- 3 Training & enablement** Team workshops, onboarding and process documentation.
- 4 Ongoing support** Flexible maintenance, optimisation and expansion — deal-dependent.
- 5 Tool & subscription management** Managing relevant client AI / automation tools where appropriate.

Pricing is **project-based** and deal-dependent — no fixed public packages. Land with an assessment, grow into projects and recurring support.

How Lenoo wins clients.

Content & education

LinkedIn, workshops, video, case studies, AI-readiness sessions

Partner network

Agencies, consultants, business-setup firms, accountants, CRM vendors

AI assessment / discovery call

The paid entry point that qualifies and scopes

Implementation project

The core engagement

Support, referral & products

Recurring revenue that compounds into the next deal

Founder-led sales and existing UAE business relationships get the first deals. **Referral partnerships** with people SMEs already trust become the scalable channel.

Practical AI **education** builds authority and inbound; direct outreach targets businesses with obvious lead-management and operational pain.

What companies get from Lenoo AI.

Faster lead response

Enquiries answered in seconds, not hours — fewer leads lost to slow follow-up.

Time saved every day

Repetitive manual work automated so the team spends its hours on real client work.

Fewer errors

Systems connected end-to-end — no copy-paste mistakes or dropped handoffs.

24/7 client support

Instant answers from approved company knowledge, with a human escalation path.

Higher conversion

Faster, consistent responses turn more enquiries into paying clients.

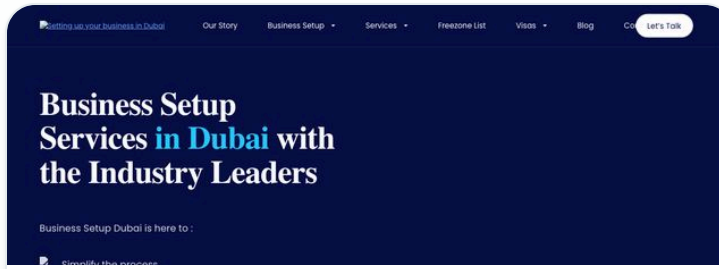

Adoption that sticks

Tools built around real workflows, with training — so teams actually use them.

Every engagement is measured on a real client metric: time saved · response speed · workload reduced · conversion lift.

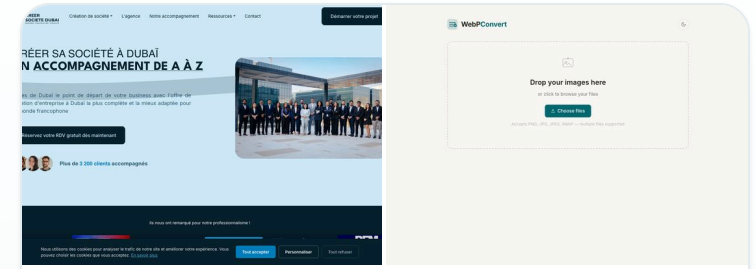

Real client work, already shipped.
