

Remindero

Call or meeting ends Message sent Follow-up set, automatically

Remindero turns a quick WhatsApp or Telegram voice note into a scheduled reminder, and syncs straight to your reminder and CRM. **No forgetting.**

📍 Dubai, United Arab Emirates

⚡ SaaS for busy professionals

🔗 remindroapp.com

Busy professionals forget to follow up, and the CRM is always behind.

- ✓ A call ends and the next step lives in **memory** only, until it's forgotten by the next call.
- ✓ What should take five seconds turns into **unlocking a phone, opening an app, and typing it out by hand.**
- ✓ The tool meant to help, the CRM, is **too much friction** for something that should take five seconds.
- ✓ So reps skip it entirely, and follow-ups quietly **fall through the cracks.**

Send a note. Remindero sets the follow-up.

Right after a call, send Remindero a quick voice note or message on WhatsApp or Telegram. It reads it, and creates a scheduled follow-up automatically in Google Tasks or Google Reminders, with an optional sync to HubSpot, Salesforce, Zoho, Pipedrive or Odoo for teams that already run a CRM.

Built for anyone who needs a quick reminder, not just sales.

Not just sales teams: operations managers, logistics staff and field reps all finish calls or site visits with no system to catch the follow-up, only memory and scattered notes.

Sales & client-facing teams

SME sales teams and reps handling repeat calls and conversations

High call volume across WhatsApp and Telegram

Pain: follow-ups live in memory or scattered notes, not a system

Operations & logistics

Ops managers and logistics staff coordinating shipments, vendors and schedules

Constant handoffs between calls, sites and teams

Pain: next steps get lost between one call and the next

Solo operators

One person running sales, support, admin or field work at once

No spare time to open a CRM or app after every call

Pain: follow-ups get forgotten between jobs

Too small for enterprise CRM seats, too busy to build their own automation: **the gap Reminderero fills, across every industry.**

The market, bottom-up.

TAM · UAE PROFESSIONALS WHO NEED REMINDERS

\$216M

per year, if every one bought

~1.2M UAE professionals in sales, operations, logistics and client-facing roles × \$180 blended ACV

SAM · REACHABLE IN 3 YEARS

\$21.6M

per year

~120,000 professionals (10% of TAM) made aware via SEO, content, direct sales and the founding team's existing relationships across sales, ops and logistics roles

SOM · 3-YEAR TARGET

\$1.08M

ARR

~6,000 paying users: 25% of SAM tries the free tier, 20% of trials convert to paid

Universe: ~4M working professionals across the UAE in client-facing, field and coordination roles (UAE Federal Competitiveness and Statistics Centre, 2023). TAM narrows this to the ~30% who regularly handle calls, site visits or handoffs needing a follow-up reminder, sales, operations, logistics, field service and client-facing roles alike, = ~1.2M professionals. SAM assumes 10% of that pool becomes aware of Reminderero within 3 years through SEO, content, direct sales and the founding team's existing relationships across those industries. SOM assumes 25% of the aware segment tries the free tier and 20% of trials convert to a paid plan. Blended ACV of \$180/year assumes an 80/20 mix of Starter (\$12/mo) and Team (\$29/mo) plans, reflecting a lightweight, per-user utility rather than a CRM-scale price point. Every step is a modeled assumption, not a measured result: the product is pre-launch. Sources: FCSC 2023 · Dubai SME · CBUAE.

How Remindero makes money, and how it finds customers.

REVENUE

A single revenue line: **SaaS subscriptions**, priced by number of follow-up tasks created and users, not by CRM-scale data volume: it's a lightweight utility, priced like one.

1 **Free**

30 follow-up tasks / month, 1 user,
to try it after real calls.

2 **Starter**

CORE

\$12/month, unlimited tasks, 1 user.

3 **Team**

\$29/month, unlimited tasks, up to 5
users, for small teams.

GETTING CLIENTS

SEO

Organic content around follow-up habits and productivity, across sales, ops and field roles

Marketing

Social media and content, building on the founder's existing SME relationships from eight years of delivery work

Partnerships

Working with CRMs, agencies and industry platforms to reach teams already using WhatsApp and Telegram

Direct sales

Founder-led outreach, drawing on those same relationships already in the UAE market

Why Remindero wins.

	MANUAL (CHAT + SPREADSHEET)	CHATBOT BUILDERS	BIG CRM	REMINDERO
Turns a voice note into a task in seconds	—	—	—	✓
No app-switching required	—	—	—	✓
Works inside chat apps already used	—	✓	—	✓
Doesn't require CRM adoption	✓	✓	—	✓
Priced for a single rep, not enterprise seats	✓	✓	—	✓

Chat-native · zero CRM dependency · priced for a single rep · **the fastest way from a call to a scheduled follow-up.**

Built by someone who has lived this exact problem.

Shadi Hossam

Founder & Marketing Manager

Marketing Manager with 4+ years running international client campaigns across the USA, MENA and Egypt, currently at Udjat Agency where he has managed more than 250 projects, ranked client campaigns first on Google as an SEO specialist, and launched 5 internal AI projects. Promoted from sales specialist to leading a 50-person sales team, and also a Marketing Instructor at Pharos University. Fluent in English, Arabic and French, he watched the same follow-up-slips-through-the-cracks problem play out across every client account before building Reminderero to fix it directly.

250+

Marketing management

Overseeing 250+ projects across US, MENA and Egypt client accounts

#1

Growth & SEO

Ranked client campaigns #1 on Google search as an SEO specialist

5

Product & AI

Launched 5 internal AI projects, building and shipping Reminderero directly

Teams

Team management

Promoted from sales specialist to managing marketing and sales teams

Built for every follow-up that **shouldn't slip.**

Founded by someone who watched the same follow-up-slips-through-the-cracks problem play out across every client account for eight years, and built Remindero to fix it directly.
